

Number of times a resolved issue has been rejected

Use case

This calculated field returns the **number** of times a **resolved issue** has been **rejected**.

To do so, we're counting the times the status is changed to "Rejected", but only when a resolution is set.

Configuration

1

[Create](#) a new **Calculated Number Field (by JWT)** custom field and name it properly.

Providing a description will help you to identify what the custom field does but this step is **optional**.

2

Parser expression

Add the following expression:

Math expression for Calculated Number field:

```
%{issue.resolution} != null ? count(timesOfTransition("", "Rejected")) : null
```

3

Display format

1

Content type

Choose **Number**

2

Number format pattern

Enter **### times**

Check the parameter **Uninitialized when calculated value is zero**

4

Add the field to the relevant view **screens**.

Remember: All calculated fields are **read-only** and cannot be manually updated on a create or edit screen.

5

Check the results

Once configured and added to an issue screen (a parent issue), the result will look like this:

Default Configuration Scheme for JWT calculated field

Default configuration scheme generated by Jira

Applicable contexts for scheme: [Edit Configuration](#)

Issue type(s):

Global (all issues)

Expression:

```
{% issue.resolution %} != null ? count(timesOfTransition('Rejected')) : null
```

[Edit expression](#)

Display format: **Number** with the following format: ### times.

Field will be considered as **uninitialized** (i.e. will return null) when calculated value is **z**

[Edit display format](#)

The screenshot shows the DECADIS APPS interface. The top navigation bar includes tabs for Dashboards, Project Shuttle, Projects, Issues, Boards, xPort, and Charts. The main area displays a task configuration for 'Intro blog graphic'. The task is in 'DONE' status. A JWT calculated field is highlighted, showing '2 times'. The interface includes a sidebar with navigation icons, a top navigation bar with tabs like Dashboards, Project Shuttle, Projects, Issues, Boards, xPort, and Charts. The main area shows task details, description, and attachments.
