

Project shuttle

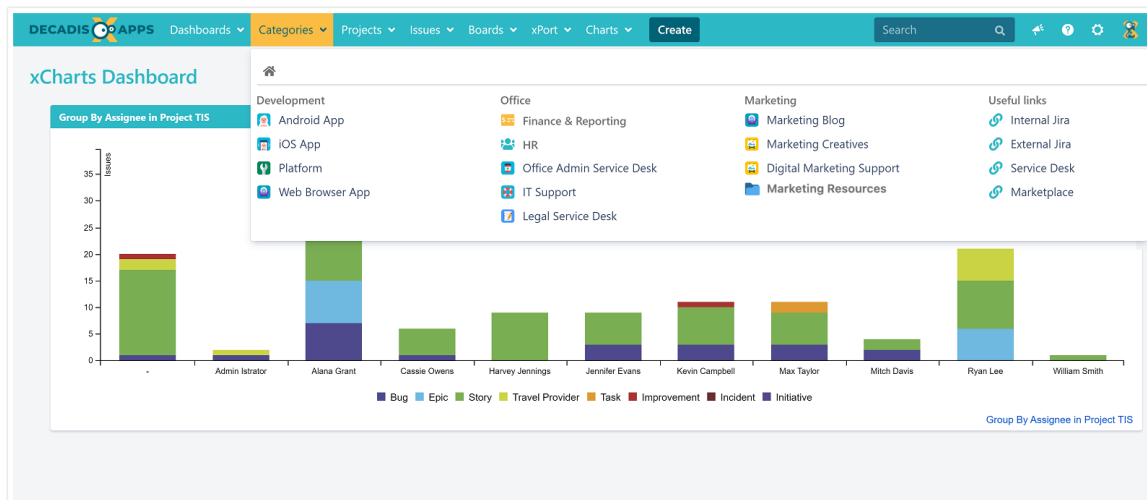

SINCE VERSION 2.6.0 The **Project Shuttle** simplifies the **navigation** between your projects within Jira!

A new **dropdown menu** will be added to the main toolbar which can be used to **quickly navigate** to your favorite **projects or links**!

By adding **categories**, projects or links can be further grouped.

NEW

Want complete control? Just use custom icons to design the project shuttle to your needs!

The projects can be divided into **categories** and **sub-categories** (in the image above: "**Development**", "**Office**", "**Marketing**" and "**Useful links**" as categories and "**Marketing Resources**" as sub-category).

Once set up, the Project Shuttle is visible for every user in Jira.

Usage

The Project Shuttle can be used by **every Jira user**. Only projects the user has access to (Browse Projects permission) will be shown.

When the Project Shuttle is activated but either no categories are defined or projects have not yet been added, the menu won't be displayed.

Configuration

For the navigation configuration, Jira Administrator permissions are **required**.

Where to configure the project shuttle?

The Project Shuttle can be set up via **Jira administration** **Manage apps** **Project Shuttle**

The screenshot shows the Jira Administration interface. At the top, there's a teal header with the 'DECADIS APPS' logo and navigation tabs: Dashboards, Categories, Projects, Issues, Boards, xPort, Charts, and a 'Create' button. A search bar is on the right. Below the header, the 'Administration' section is active, with a search bar for 'Search Jira admin'. The left sidebar lists various administration areas: APPLICATIONS, PROJECTS, ISSUES, and MANAGE APPS (which is highlighted). Under 'MANAGE APPS', there are links for 'Project Shuttle', 'User management', 'Latest upgrade report', and 'System'. The main content area is titled 'Project Shuttle Configuration'. It features a toggle switch for 'Enable Project Shuttle' which is turned on. To the right of the toggle is an 'Edit menu title' button. Below the toggle are four buttons: 'Add category', 'Add projects', 'Add link', and 'Expand / Collapse categories'. The configuration is organized into two main sections: 'Development' and 'Office'. The 'Development' section includes 'Android App', 'iOS App', 'IT Operations', 'Platform', and 'Web Browser App'. The 'Office' section includes 'Finance & Reporting', 'Finance Service Desk', 'Financial Month End', and 'Sales Ops'.

Rename the menu title

SINCE VERSION 2.9.2

By default, the project shuttle can be found in the main toolbar as "**Categories**".

1

This can also be easily customized by hitting the **Edit menu title** button in the upper right corner!

Categories

Categories can be used to group your projects and links like shown on the previous screenshots.

1

To add a new category, head over to **Administration Manage apps Project Shuttle** and click on **Add category**.
a name has to be set. Optionally, a parent category and an icon can be selected.

2

The category will now be shown in the list.

 **Performance Engineering**

☐  Show already added projects

Save Cancel

Projects on the **left side** can be added. Projects on the **right side** already have been added and can be deleted by hovering over the specific one and clicking "Remove".

Enabling the option to **Show already added projects** will optionally list all available projects, even those that are already used in the Project Shuttle.

Sorting via Drag & Drop

Categories and projects can be easily sorted via drag & drop.

Your browser does not support the HTML5 video element

Expand/Collapse categories

Selecting the **Expand/ Collapse categories** button will hide/show all projects being used in categories. This feature simplifies the navigation and sorting.

Useful links

URLs in the project Shuttle

SINCE VERSION 2.6.2 URLs can be added to the navigation in the Project Shuttle. Adding links is done similarly to adding projects. They can be added to the top level of the navigation or to categories as shown in the screenshot:
