Fields

Custom fields

The custom field prefix was removed to leave only the ID. Custom fields can be filtered by **name**, **type**, available **context** (issue type(s), project(s)), **screens**, or **status** (if they are locked).

Searchable items

Filter by	Searchable items				
	ID	Name	Key	Translation name	Status
Name	✅	✅			
Type		✅			
Search template		✅			
Issue types	✅	✅		✅	
Projects	✅	✅	✅		
Screens	✅	✅			
Locked					Yes/No

SINCE VERSION 2.8.0 the custom field filter bar is available by clicking on the tab "**Advanced**", due to the changes in Jira UI in versions after Jira 7.13.0

10013	**Epic Status** LOCKED Epic Status field for Jira Software use only.	Status of Epic	Jira Software Epic Status Searcher	1 issue type		⋯

Associate custom field to screens

If you create a new custom field or edit the associated screens of an existing custom field, the list of available screens can be very long. It is possible to filter this list to work effectively.

You also find an ID with the screens. (See the table above).

Associate field Epic/Theme to screens

Associate the field Epic/Theme to the appropriate screens.
You must associate a field to a screen before it will be displayed. New fields will be added to the end of a tab.

View field configuration

If you configure your field configurations there will be a different ID. The entries in this column correspond to the labels or custom field IDs of the respective fields and are highlighted in color as follows:

Status	Meaning
ACTIVE	This field is active within this configuration.
HIDDEN	This field is hidden within this configuration.
REQUIRED	This field is required within this configuration.

View Field Configuration

The table below shows all fields configured in Jira and their properties for **Field Configuration**.

You can use this page to make fields required, hide/show fields and specify their description.
