

Drag & drop pages

Since Space Admin **VERSION 2.3.0**, it is possible to directly **reorder the pages within the page tree!**
No need to open any other configuration menu!

A page can be moved by any user who can edit it.

If you need to disable this feature - we're currently receiving requests stating that there can be problems when using the **Safari** browser - you can temporarily do so by disabling the module **Page Tree Sorter Web Resource** like shown below:

Your browser does not support the HTML5 video element

Your browser does not support the HTML5 video element

Works together!

The new drag and drop feature is also available with **Refined** installed!

Configuration

SINCE VERSION 2.3.1

By **default**, a page can only be **moved** while pressing and holding the **Shift key** on your keyboard.

This behavior can be updated in the **Space Admin settings**:

Configuration

Permissions

Configure the permission to use Space Admin. The App itself also takes care of the default permissions in Confluence. If no selection is made, everyone can use all the functions of Space Admin, regarding global and space permissions.

Space Administrators

☐ Allow Space Administrators the usage of the Space Admin App functions

Groups

atlassian-staff x

Choose groups to grant usage of the Space Admin functions
