

Advanced Roadmaps for Jira (formerly Portfolio for Jira)

Advanced Roadmaps (formerly Portfolio) is an app that lets you keep track of your agile roadmaps and plans directly within Jira.

It lets you see the big picture and track your processes.

As of release **3.6.0** sumUp supports several of their provided **custom fields**.

Prerequisites

- sumUp for Jira Server and Data Center must be installed
- Advanced Roadmaps for Jira must be installed

Using Advanced Roadmaps custom fields in dashboards

Once a roadmap is configured and the custom fields are used, they can be added to our **gadgets** to display all relevant data.

💡 Not only displaying but also **grouping** by Advanced Roadmaps' custom fields is possible!

Filter Results (by sumUp): Advanced Roadmaps					
Issue Type	Key	Summary	Team	Parent Link	Original story points
🔧	WEB-29	Quick payment	Team Travel Web Team 1	🔗 PM-5 Fast-track booking experience	
🔧	WEB-28	Fast trip search	Team Travel Web Team 1	🔗 PM-5 Fast-track booking experience

Supported custom fields

As of now, not all custom fields are supported by sumUp.

Supported	Not supported
✔ Team	✖ Start date
✔ Parent link	✖ End date
✔ Original story points	

Advanced Roadmaps and calculation rules

Advanced Roadmaps and calculation rules

It is possible to create [calculation rules](#) for the custom field **Original story points**.

Once configured, the calculation will be displayed in your **gadgets, rows** and everywhere you need it!
