Two Dimensional Filter Statistics gadget

The **Two Dimensional Filter Statistics Gadget** works like the built-in Two Dimensional Filter Statistics gadget for Jira extended by a total column as well as a total row for a numeric custom field.

Two Dimensional Filter Statistics (by sumUp): JQL						
Status	🔴 Bug	⚡ Epic	🟩 Story	🟦 Sub-task	✅ Task	Σ
TO DO	6	3	23	6	2	40
IN PROGRESS	1		11	5		17
VALIDATION			1			1
DONE	3		23	3		29
Σ total ⌄ ⓘ	10	3	58	14	2	87

⚙️ Configuration

What is the name of your gadget?

Optionally, type in a **name** for the gadget.

Which issues do you want to analyze?

Select an existing **filter** or choose to enter custom **JQL**.

Enter a valid JQL query

Only available if **Custom JQL** was selected in the Filter parameter.

No need to create hundreds of filters to be used in various gadgets - simply define the result set by adding custom JQL!

Which fields would you like to display?

Select the field that you want to calculate a sum for.

Only certain fields can actually be summed up (e.g numeric fields, text fields with numeric values etc.)

Which fields do you want to see on the x-Axis?

Select a field that will be used to **group** the **results** by on the **X-axis**.

Which field do you want to see on the y-Axis?

Select a field that will be used to **group** the **results** by on the **Y-axis**.

How many rows do you want to display per page?

Choose how many results you want to display on your dashboard.

Which time period do you want to display as default?

`SINCE VERSION 3.8.0`

If you have chosen to group the data by a **date** (e.g. **Due date**), you can set a default time period for the displayed data when the gadget is loaded or refreshed.

You can choose between:

- **Current week**
- **Current month**
- **Current quarter**
- **Current year**
- **All-time**

Which default for the date aggregation level do you choose?

`SINCE VERSION 3.8.0`

If you have chosen to group the data by a **date** (e.g. **Due date**), you can set a default aggregation level for the displayed data when the gadget is loaded or refreshed.

- **Daily**
- **Weekly**
- **Monthly**
- **Quarterly**
- **Yearly**

Refresh Interval

You can choose between:

- **Never**
- Every 15 Minutes
- Every 30 Minutes
- Every 1 Hour
- Every 2 Hours

> ⓘ If **Never** is selected, the gadget will only be refreshed on page reload.

👁 View mode

Sorting

The colums can be sorted by **clicking on the small arrows** next to each colum header.

Filter bar

The gadget displays an additional filter at the top when **a date field is selected** in the configuration.

Initially, it is pre-populated with the value set in the configuration and the data is displayed accordingly.

| Current year ▼ | 01/Jan/24-31/Dec/24 ⊗ | shown | Monthly ▼ | ⓘ |

It contains the following options:

Option	Description
Time Period	The **drop-down menu** contains the options in the following order: • **Current week** • **Current month** • **Current quarter** • **Current year** • **All-time**
Date picker	The picker allows you to override the **Time Period** selection. You can select the start and end dates of the aggregated data by clicking first on the start date and then on the end date. ⓘ To enter your chosen date, click next to the expanded calendar. If the date range is not customized, it reflects the chosen **Time period**. For example, the period selection would display **01/Jan/24-31/Dec/24** if the **Current year** option is selected. If the date range is adjusted, the **Date Filter View** changes to **Customized**.

Date grouping	The selector determines how the data is grouped in the columns/rows of the table.
	The drop-down menu contains the following options: • **Daily** shown as separate dates. • **Weekly** shown as W1, W2, W3,... • **Monthly** shown as M1, M2, M3,... • **Quarterly** shown as Q1, Q2, Q3, Q4 • **Yearly** shown as Y/22, Y/23, Y/24, ... If the data spans more than one year, the Weekly, Monthly and Quarterly data are shown with the year as suffix, e.g. Q1/24.
Info icon	The tooltip displays information about the data displayed in the gadget.

/Ø total

SINCE VERSION 3.8.0

You can choose between the overall **total** or the total of the **page**. Or you can choose between the **Ø total** or the **Ø page**, if you have selected average fields.

📁 Use cases and examples

Use case	Description	Gadget
Issues due this week	Displays how many issues are due for each assignee in the current week.	Two Dimensional Filter Statistics
