Space Admin for Confluence Release Notes 2.3.0

e

Release date	21 Jan 2021
Release type	FEATURES IMPROVEMENTS MAINTENANCE
Highlights	Reorder pages like a pro with the new drag and drop sorting of pages

Features

- Drag and drop sorting of pages directly within the sidebar
- Changing the publish date of blog posts

Improvements

- Added possibility to add a pre- or suffix to child pages while copying a page
- Extended Space Shuttle permissions to control categories and web links
- Shortcut for adding new pages changed to 'i' to prevent double assignment
- Shortcut for copy pages changed to 'a' to prevent double assignment

Bug fixes

- Fixed NPE in attachment cleanup service that could result in corrupt pages

If you need to **disable drag and drop sorting within the sidebar** - we're currently receiving requests stating that there can be problems when using the **Safari** browser - you can temporarily do so by disabling the module **Page Tree Sorter Web Resource** like shown below or updating to Space Admin version 2.3.1:

Your browser does not support the HTML5 video element
