Drag & drop pages

Since Space Admin version 2.3.0, it is possible to directly **reorder the pages within the page tree!** No need to open any other configuration menu!

A page can be moved by any user who can edit it.

If you need to disable this feature - we're currently receiving requests stating that there can be problems when using the **Safari** browser - you can temporarily do so by disabling the module **Page Tree Sorter Web Resource** like shown below:

Your browser does not support the HTML5 video element

Your browser does not support the HTML5 video element

Works together!

The new drag and drop feature is also available with Refined installed!

Configuration

SINCE VERSION 2.3.1

By default, a page can only be moved while pressing and holding the Shift key on your keyboard.

This behavior can be updated in the Space Admin settings:

The following options are available:

- Enabled holding shift key (enabled by default): Pages can only be moved when holding the Shift key while dragging and dropping
- Enabled: Pages can be always mode by just dragging & dropping. No additional key needs to be pressed
- Disabled: The feature is disabled and cannot be used.

If you still have questions, feel free to refer to our support team.
