

Grouped Filter Results (by sumUp)

The **Grouped Filter Results (by sumUp)** gadget calculates sums of multiple fields while the source issues are **grouped** by one custom field.

Grouped Filter Results (by sumUp)

Issue Type ^	Original estimate ▾	Time Spent ▾
Epos	10 weeks, 2 days, 4 hours, 1 minute	1 week, 4 hours
Feedback	0	0
Idea	0	0
Mock ups	1 day, 6 hours	0
Service Request with Appro...	0	0
Spike	4 hours, 1 minute	2 weeks, 5 hours
Story	10 weeks, 3 days, 3 hours, 10 minutes	1 day, 3 hours
Sub-task	2 weeks, 6 hours, 40 minutes	6 hours
Task	3 hours, 57 minutes	6 hours, 43 minutes
Σ	23 weeks, 4 days, 3 hours, 49 minutes	3 weeks, 4 days,...

Configuration

Which issues do you want to analyze?

Select whether you want to use a **predefined JQL Filter** or a **custom JQL** to get the issues.

No need to create hundreds of filters to be used in various gadgets - simply define the result set by adding a custom JQL!

Which fields would you like to display?

Add fields to be displayed as **columns** and reorder them using **drag** and **drop**.

Only certain fields can actually be summed up (e.g numeric fields, text fields with numeric values etc.)

How do you want to group the results?

Select a field that will be used to **group** the **results** on the **y-Axis**.

Examples:

Issue type			
:: Grouped Filter Results (by sumUp)			
Issue Type ^	Original estimate :-	Time Spent :-	Issues
 Epos	10 weeks, 2 days, 4 hours, 1 minute	1 week, 4 hours	114
 Feedback	0	0	11
 Idea	0	0	7
 Mock ups	1 day, 6 hours	0	8
 Service Request with Appro...	0	0	16
 Spike	4 hours, 1 minute	2 weeks, 5 hours	83
 Story	10 weeks, 3 days, 3 hours, 10 minutes	1 day, 3 hours	321
 Sub-task	2 weeks, 6 hours, 40 minutes	6 hours	125
 Task	3 hours, 57 minutes	6 hours, 43 minutes	107
Σ	23 weeks, 4 days, 3 hours, 49 minutes	3 weeks, 4 days,...	794

How many rows do you want to display per page?

Choose how many results you want to display on your dashboard.

Choose additional options

Optionally, you can set different additional options to change the behavior of this gadget.

Choose additional options

- ☐ Do you want to refresh your data every 15 minutes?
- ☐ Do you want to group by name instead of ID?
- ☐ Do you want to include links to the issue navigator?

Option	Description
Do you want to refresh your data every 15 minutes?	Check this option to refresh the results of the gadget every 15 minutes. Enabling this option is useful when displaying information that needs a periodic refresh. For example, displaying the gadget on a wallboard.

Do you want to group the elements by name instead of their ID?	This option is helpful if you wish to group the results by fields that share the same name or the options. For example, if you have a fix version named "EAP_Q2" across multiple projects, checking this option will ensure the results will be grouped under the same name instead of showing them as separate entries. - By default, all values will be grouped by their ID, meaning that fields or options that share a common name will be treated as two different values, since they don't have the same ID in the database. When checking the checkbox, options with the same option name will be treated as one option, even though they are saved as different values in the database. - This option is not available for all the fields. It is only available on selecting the certain fields in "Group by" section that could share same name or options. Some of the fields where this option is applicable are: Versions Components Issue type Severity Sprint Status Option-based fields
Do you want to include links to show results in the issue navigator?	If you are someone who likes seeing the issues behind numeric entries on the gadget, this option is your match. With this option checked, you are taken to the Issue navigator page every time you click on a numeric entry on the sumUp gadget. Once you are on the Issue navigator page, you can see the JQL (and subsequently the issues) that accounts for the numeric entry displayed on gadget. In case of text fields, it is not possible to perform an exact search due to limitations of Jira Cloud JQL, so it may happen that more issues are shown than expected. If the text field contains special characters ((" ") + . , ; ? ! * / % ^ \$ # @ [] < >), they will be ignored in the JQL search. If you do not usually go to the Issue navigator or if the loading time for your gadget is too high, leave the option unchecked.
Which time period do you want to display as default?	If you have chosen to group the data by a date or date time field (e.g. Due date or Created), you can set a default time period for the displayed data when the gadget is loaded or refreshed. You can choose between: Current week Current month Current quarter Current year All-time
Which default date aggregation level do you choose?	If you have chosen to group the data by a date or date time field (e.g. Due date or Created), you can set a default aggregation level for the displayed data when the gadget is loaded or refreshed. You can choose between: Daily Weekly Monthly Quarterly Yearly

View mode

Sorting

Sorting

The columns can be sorted by clicking on the small arrows next to each column header.

Filter bar

The gadget displays an additional **filter** at the top when a date field is selected in the **configuration**.

Initially, it is pre-populated with the value set in the configuration and the data is displayed accordingly.

Option	Description
Time period	The drop-down menu contains the options in the following order: • Current week • Current month • Current quarter • Current year • All-time

Date picker	The picker allows you to override the Time period selection. You can select the start and end dates of the aggregated data by clicking first on the start date and then on the end date.  ⓘ To enter your chosen date, click next to the expanded calendar. If the date range is not customized, it reflects the chosen Time period. For example, the period selection would display 01/Jan /24-31/Dec/2024 if the Current year option is selected. If the date range is adjusted, the Date Filter View changes to Customized.
Date grouping	The selector determines how the data is grouped in the columns/rows of the table. The drop-down menu contains the following options: • Daily shown as separate dates. • Weekly shown as W1, W2, W3,... • Monthly shown as M1, M2, M3,... • Quarterly shown as Q1, Q2, Q3, Q4 • Yearly shown as Y/22, Y/23, Y/24, ... If the data spans more than one year, the Weekly, Monthly and Quarterly data are shown with the year as suffix, e.g. Q1/24.
Info icon	The tooltip displays information about the data displayed in the gadget.
