sumUp for Jira Cloud Release Notes 1.2.2-AC

Release date	01 Mar 2021
Release type	FEATURES　　IMPROVEMENTS　　MAINTENANCE
Highlights	Added support for **next-gen projects** and extended support for **Advanced Roadmaps** and **Insight**

Features

- Support for **next-gen projects**
- Extended support for **Advanced Roadmaps**, e.g. grouping by **Teams** in gadgets
- Extended support for **Insight**, e.g. showing **object names** in gadgets instead of keys
- Introducing a new **group strategy** that supports grouping by names instead IDs to be used in the **Two Dimensional Filter Statistics**, **Grouped Filter Results** and **Work Log Report** gadget

Improvements

- **Filter names** in gadgets are now **clickable**
- Trying to calculate fields being unavailable for the issues returned by the configured filter now results in an error message

Bug fixes

- Calculations were done based on option ids instead of the actual number values when using single select custom fields
