JWT release notes 3.0.2

Release date	02 Feb 2021
Release type	MAINTENANCE
Highlights	Maintenance release

Improvements

- Smart UI improvements for the Expression parser handbook and several configuration components
- The customer request type field of Jira Service Management can now be set by name

Bug fixes

- Components and users could not be loaded or selected correctly in the configuration view of some post functions
- The "Team" field of the 3rd party app Tempo Timesheets could no longer be set when using Tempo Timesheets from version 11.0 onwards
- Reading values of cascading selects using the Basic or JQL mode of the Expression parser always returned the parent and the child level as a value
- Previously configured rules within the Update field based on rules post function containing a text comparison ignoring the case could not be edited anymore
- Issue links configured in the "Create issue" post function were not encoded correctly
- Seed issue field codes could not be used in Copy fields from linked issues or subtasks post function
