

Admin Toolbox Release Notes 2.11.0

Admin Toolbox 2.11.0 was unpublished due to potential **performance issues** caused by the newly introduced **bulk changes for projects**.

Please make sure to use the updated version [2.11.1](#) instead which remedies any potential problems.

Release date	11 Nov 2020
Release type	FEATURES IMPROVEMENTS MAINTENANCE
Highlights	Introducing bulk changes for projects (components, versions and users and roles)

New features

- Added [bulk changes](#) for projects - edit components, versions and users and roles for multiple projects at once
- Extended drag and drop sorting - now supporting custom field options, validators and favourite dashboards
- Added a quick link to copy a transition to the workflow editor's diagram mode
- Added a quick link to access the create transition to the workflow editor's text mode

Improvements

- Filters now provide a 'Select all' and 'Clear all' option
- Filter tables are now sortable
- Workflow filters now include a 'Has draft' option
- Improved dialogue for adding projects to the [project shuttle](#)
- The current workflow is now preselected when copying a transition
- Bulk delete is now available for priority schemes
- Confirmation screen now shows 'Last modified' (date and user) when bulk deleting workflows
- CDN usage is now officially supported for Data Center

Bug fixes

- Usernames instead of full names were displayed on the projects page
