

Check for at least one component

On this page

[Configuration](#) | [Related use cases](#)

Use case

In the following use case the transition can only be executed, if there is at least one component defined for that issue.

Configuration

1

Add the condition or validator to the desired transition or create a new transition.

2

Field

Choose **Component/s** and select **is required**

The following parameters are **only available**, if you are configuring this use case as a **validator**.

Validator only

1

Error message

Please add a component.
