

sumUp for Jira Release Notes 3.6.0

Release date	28 Jan 2021
Release type	FEATURES MAINTENANCE
Highlights	Extended support for Advanced Roadmaps and Insight

New features

- Extended support for [Advanced Roadmaps](#), e.g. grouping by **Teams** in gadgets
- Extended support for [Insight](#), e.g. showing **object names** in gadgets instead of keys
- Introducing a new **group strategy** that supports grouping by names instead of ids to be used in the [Two Dimensional Filter Statistics](#), [Grouped Filter Results](#) and [Work Log Report](#) gadget

Improvements

- [Filter Results](#) gadget now supports calculation rule templates
- Velocity **MathTool** is now usable within [formatting templates](#)
- **Filter names** in gadgets are now clickable

Bug fixes

- Calculations were done based on option ids instead of the actual number values when using single select custom fields
- Boards were showing two toggle buttons when using Zephyr for Jira
- The global configuration for boards was limited to 50 boards per instance
