

# Make a fix version required and add a comment

On this page

[Configuration](#) | [Related use cases](#)

## Use case

In the following use case the transition can only be executed, if a fix version is set and a comment has been added.

### Configuration

1

Add the validator to the desired transition or create a new transition.

2

#### Field

Choose **Fix version/s** and select **is required**.

3

#### Field

Choose **Comments** and select **must be changed**.

The following parameters are **only available**, if you are configuring this use case as a **validator**.

## Validator only

1

#### Error message

A fix version must be set and a comment must be added in order to proceed.
