Time in status (By issue attribute)

The time in status shows the accumulated time of issues chosen via JQL in a specific status. Additional grouping is possible on the Y axis, by using the GroupBy Parameter.

Grouping by None will display the overall time in Status for the issues chosen via JQL.

Chart preview

Parameters

Parameter		Type	Default value
UI	**Code**		
JQL	`JQL`	JQL Autocomplete	
Group By	`Group`	Group By Picker	Issue Type

Layout Script

Used layout: **Easy Group By**

```
function formatTooltipAsHours(value, ratio, id, index)
{
    return value.toFixed(2) + ' h';
}

function formatTooltipAsHoursWithDays(value, ratio, id, index)
{
    var hours = parseInt(value);
    var days = parseInt(hours / 24);
    value = value - days * 24;
    if (days > 0)
    {
        return days + 'd, ' + value.toFixed(2) + ' h';
    }
    return value.toFixed(2) + ' h';
}

var c3arg = {
    onrendered: updateFrameHeight,
    data: chartData,
    axis: {
        x: {
            type: 'category', // this is needed to load string x value
            label: {
                text: chartData.custom.xLabel,
                position: 'outer-left'
            }
        },
        y: {
            label: chartData.ytype
        }
    }
};

if (chartData.custom && chartData.custom.tooltip)
{
    var tooltipFunction = eval(chartData.custom.tooltip);
    c3arg.tooltip = {
        format: {
            value: tooltipFunction
        }
    };
}

c3.generate(c3arg);
