

Get started

Confluence is built on **spaces** and **pages**, and these key elements need careful management if the goal is to collaborate on meaningful and up-to-date information.

The more you dive into Confluence content management, the more challenges you will face on a daily basis. **Space Tools Pro** fills these gaps and hands you the tools to manage Confluence like a pro - from quickly creating or renaming pages to copying an entire space - all done with a few clicks in a consolidated view.

Install Space Tools Pro

Install **Space Tools Pro** directly from your Confluence Cloud site.

You need to be a Confluence administrator to install apps!

1

In the upper navigation bar, click on the **Apps** dropdown and select **Find new apps**.

2

The Atlassian Marketplace page will be displayed, in the search bar, type in **Space Tools Pro**

3

The app will appear on the list, select it, and start your free trial!

4

After confirming, you can find the app by; Clicking the **Apps** tab on the top navigation bar in your Jira instance or in any space, **Space Tools Pro** will be displayed on the left sidebar under **Apps**.

5

The app is ready to use and you're ready to [get started](#)!

If you still have questions, feel free to refer to our [support](#) team.

First steps

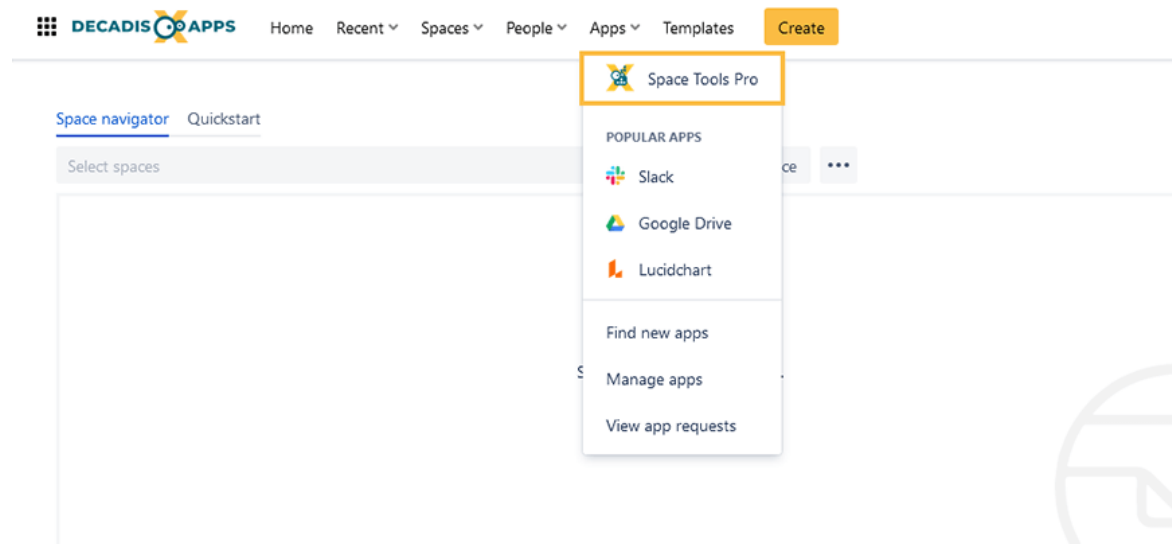

On this page, you will find the very first steps you need to take to start using Space Tools Pro after a successful [installation](#).

1

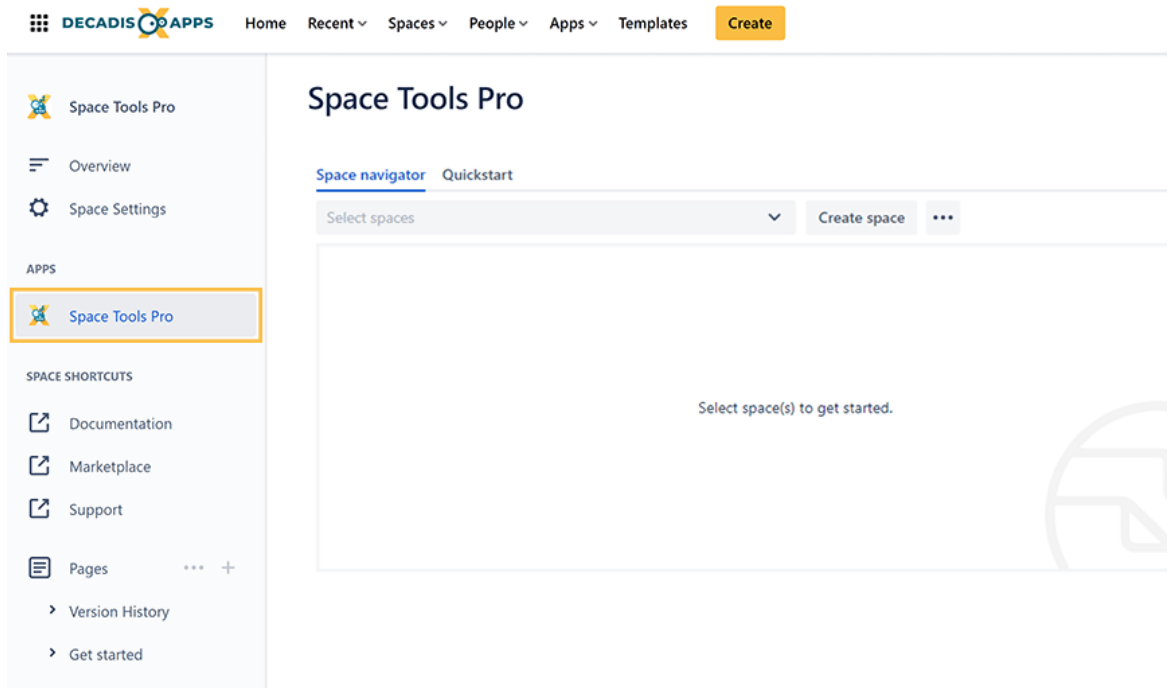

Head over to any **space** in your Confluence instance or create one.

2

On the top navigation bar in your Jira instance click on **Apps** and then on **Space Tools Pro**

Or you can also find **Space Tools Pro** by navigating to the left-hand sidebar under **Apps**.

3

In the [Space navigator](#) select the space you want to work on and you're ready to use all the features provided in the app.

If you still have questions, feel free to refer to our [support](#) team.

Highlights

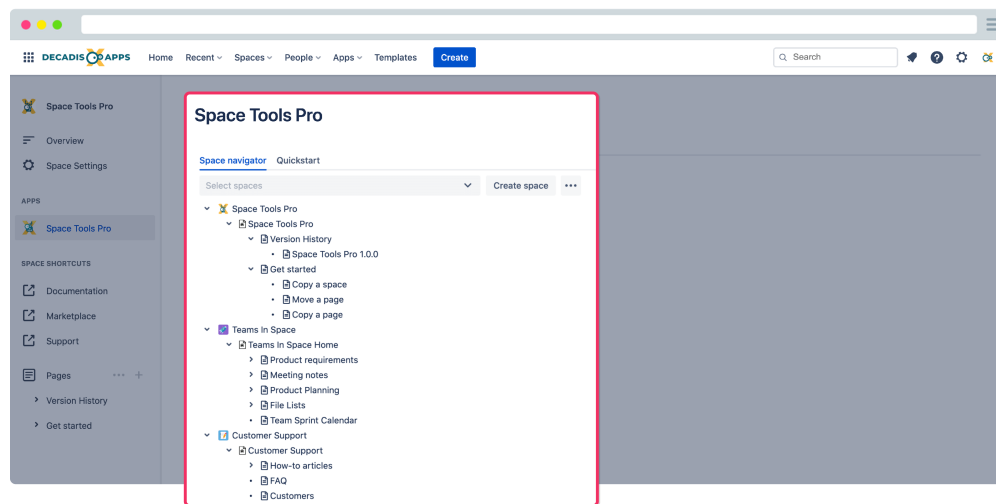

A new central gateway to Confluence content

What would you say if we told you that the access to all your Confluence content was just a click away?

The [space navigator](#) is your central gateway to access **all relevant Confluence content**.

What was previously scattered across a number of places now has a single, **consolidated home**.

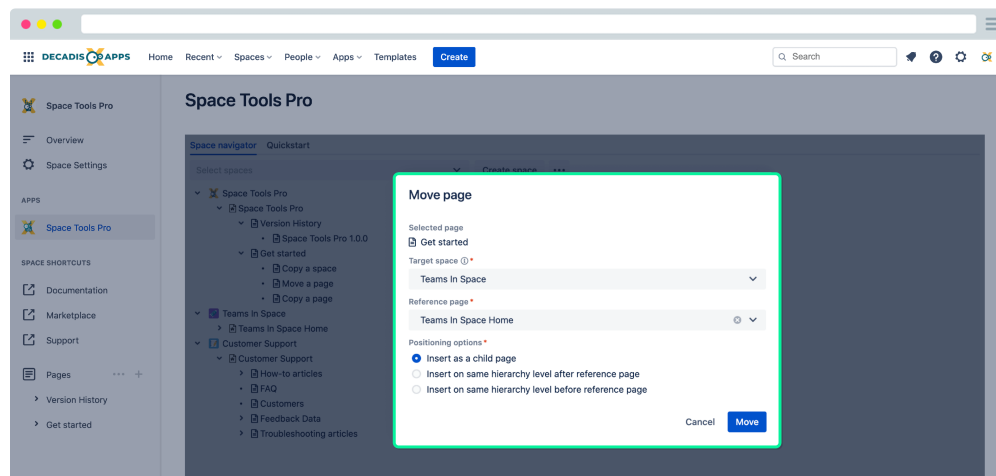

Browse through spaces and **manage, create, edit, copy** and **delete** content from one central place for maximum efficiency and ease of use.

Manage your content like a pro

Space Tools Pro will help you to **speed up your content management** and take the pain out of common tasks.

- [Page actions](#) at your fingertips: **Create, rename, copy** and **delete** pages in no time
- [Move](#) pages using [drag & drop](#) - even **across spaces**!
- Want to save even more time? Perform actions on multiple pages at once with [bulk actions](#)

Manage your space like a pro

Need to manage **multiple spaces**?

The [space navigator](#) is your one-stop shop for **creating**, **renaming**, or even **copying spaces** - yes, you can really copy entire spaces with just a few clicks.
