

second()

This function returns the **second** part of a [timestamp](#) based on a given [time zone](#).

Syntax

```
second(timestamp, timeZone) #Output: Number
```

Examples

Parser expression	Description
<pre>%{second({issue.created}, RUN_AS_LOCAL)}</pre>	This example returns: 30 .  If the issue was created on March 25th, 2020 23:15:30 the output would be 30 , for 30 seconds.
<pre>%{second(stringToDate("2020-01-01 00:30", "Europe/Berlin"), "UTC")}</pre>	This examples uses the time zone UTC , it returns: 0
