minute()

This function returns the **minutes** part of a timestamp based on a given **time zone**.

Syntax
`minute(timestamp, timeZone) #Output: Number`

Examples

Parser expression	Description
`%{minute({issue.created}, RUN_AS_LOCAL)}`	This example returns the **minute** part of the **issue creation date** If the issue was created on **March 25th, 2020 23:15:30** the output would be **15**.
`%{minute(stringToDate("2020-01-01 00:30:00","YYYY-DD-MM hh:mm:ss"), "UTC")}`	This example uses the time zone **UTC**, it returns: **30**

Additional information

Parameters used in this function

Parameter	Input (data type)	Description
`timestamp`	NUMBER	The parameter must be valid **timestamp**. Usually this value is retrieved from a field (e.g. due date, created date).
`timeZone`	TEXT	The **time zone** used for the calculation.

Output

This function returns a NUMBER
