Create space

Create one or multiple spaces without leaving the Space navigator.

Your browser does not support the HTML5 video element

1   Click on **Create space**.

2   Define a **space name**.

3   A **space key** will be **automatically suggested** depending on the new space's name, but you have the option to define a personal space key.

4   **Optional:** Add a **space description**.

5   Click on **Create**.

If you still have questions, feel free to refer to our support team.
