

Space navigator

The **space navigator** is the of **Space Tools Pro** and your operations center.

Use the **space selector** to select an existing space or multiple spaces you want to work with and get started in the **tree view**.

The space navigator lets you perform various actions on individual [pages](#), [spaces](#) or even multiple entities using [bulk actions](#).

Page actions

Space actions

Need some **visual aid** to separate out individual pages or spaces? We got you covered! Simply activate the **eye guidance**!

Your browser does not support the HTML5 video element

If you still have questions, feel free to refer to our [support](#) team.
