

# JWT Cloud release notes 2.5.0

Release date	09 Sept 2021
Release type	FEATURES
Highlights	Compare two field values during a transition easily and further improvements

## See it in action

Compare two values validator (by JWT)

Field \*

Due date

Select the field to compare the value of.

Operator

>

Select how to compare the values.

Comparison value \*

Field value

Select the type of the comparison value

Current date and time

Select the field to compare the value with.

Error message

! Due date is not in the future!

Enter the message to show to the end user when the validation fails. A default message will be added if you leave this field empty.

## Comparing two field values during a transition made easy!

Ever wrote a Jira Expression just to compare two field values? Save your time using the new [Compare two values validator and condition](#).

But there is more! With the latest release, you are able to combine the power of two languages. Use [Jira expressions](#) within JWT expressions by using the **JWT for Jira Cloud expression parser** function [jiraExpression\(\)](#).

## Further improvements

- Extending the list of JWT expression parser functions by:
  - [addDays\(\)](#)
  - [dateTimeToString\(\)](#)
  - [epic\(\)](#)
  - [filterByCardinality\(\)](#)
  - [getMatchingValue\(\)](#)
  - [hour\(\)](#)
  - [issuesUnderEpic\(\)](#)
  - [jiraExpression\(\)](#)
  - [minute\(\)](#)
  - [month\(\)](#)
  - [second\(\)](#)
  - [siblingIssuesUnderEpic\(\)](#)
  - [sort\(\)](#)
  - [sublist\(\)](#)
  - [toLogicalValue\(\)](#)
  - [year\(\)](#)

Do you have ideas for additional improvements? Many new features in our products result directly from customer feedback.

So [get in touch](#) or tweet us at [@xAppsByDecadis](#) to share yours.
