

Cloud version

The official Cloud version of Space Admin for Confluence is available as a native Forge app called **Space Tools Pro for Confluence** (see the [marketplace listing](#) and the [official documentation](#)).

Feature comparison

	Space Admin for Confluence (Server / Data Center)	Space Tools Pro
Space Admin Browser	✓	✓ In Space Tools Pro for Confluence, the Space Admin Browser is called space navigator and currently provides excellent and time-saving functions to easily create , copy , and administer pages and spaces .
Permission browser	✓	✗ The Permission browser is currently not available in Space Tools Pro for Confluence.
Attachment cleanup service	✓	✗ The Attachment cleanup service is currently not available in Space Tools Pro for Confluence.
Space shuttle	✓	✗ The Space shuttle is currently not available in Space Tools Pro for Confluence.
Space Admin settings	✓	⚠ An equivalent to the Space Admin settings is currently not part of Space Tools Pro for Confluence. When installed, all users can use and benefit from the space navigator functionality.

Migration path

The heart of Space Tools Pro for Confluence currently is the [space navigator](#), which does not need any configuration. Therefore **no migration is needed**. Just head over to your Confluence Cloud instance, install Space Tools Pro via the **Apps > Find new apps** menu, and you're good to go. Unlike in Space Admin for Confluence, however, the [space navigator](#) is no longer located in the space settings menu but in the sidebar of each space.

Changelog

Date	Notes
18 Nov 2021	Update to a more condensed table layout
08 Nov 2021	Initial public draft
