

month()

This function returns the **month** part of a timestamp based on a given **time zone** (represented by a number from 1 to 12).

Syntax

`month(timestamp, timeZone)` #Output: Number

Examples

Parser expression	Description
<code>%{month({issue.created}, RUN_AS_LOCAL)}</code>	This example returns the month of the issue creation date as a number.  Given an issue that was created on March 25th, 2020 23:15:30, the returned value is 3.
<code>%{month(stringToDate("2020-01-01 00:30", "Europe/Berlin"), "UTC")}</code>	This example returns the month part of the given date , the timezone is UTC .  Due to the time zone UTC, the output will be 12.

Additional information
