

List all issues that are blocking issues that are due soon

On this page

[Configuration](#) | [Screenshots](#) | [Related use cases](#)

Use case

In the following use case we use a **JWT JQL function** in order to retrieve **all issues** that are blocking issues that are **due in the next 7 days**.

This way you can keep track on issues that need to be done soon in order to **reach all set due dates in time**.

Configuration

Use the following JQL:

```
issue in linkedTo("due < endOfDay(7) and due > now()", "is blocked by") and resolution is empty
```

Screenshots

Using the above JQL and having issues like shown below in this example, **JWT-2** would be returned because

- The used link type is "is blocked by"
- It is blocking an issue that is due in the next 7 days
- It's resolution is empty

Related use cases

Use case	JQL function
List all bugs where the current user was mentioned in a comment	issueSelection()

List all issues that are blocking issues that are due soon	<code>linkedTo()</code>
List all issues with an inactive assignee and that were assigned by the current user	<code>issueSelection()</code>
List all issues with a specific value matching a custom text field	<code>issueSelection()</code>
Retrieve all tickets assigned to a developer	<code>usersWithRoleInProject()</code>
Return all issues in the currently open sprint with unresolved sub-tasks	<code>issueSelection()</code>
