

Reporter

Field code
<code>%{issue.reporter}</code>

Read

Returned value	User name of the reporter
Output data type	TEXT
Example output	admin.istrator

Write

Valid text input	A valid username
Valid numerical input	
Example input	admin.istrator

The input has to be a valid **user name** (not user's full name).

The value can be retrieved from multiple **sources** and other **user picker** field codes.

Alternatively check out the functions related to [Users](#), [groups](#) and [roles](#).
