

Inform the project manager about an added attachment

On this page

[Configuration](#) | [Related use cases](#)

Use case

Within the [Send email](#) post function you have the possibility to send HTML links in the message as well.

In the following use case we show an approach to send an **email** to the project lead linking the most recent attachment.

This use case is normally applied after executing a transition, if an attachment was added there. This will then be linked to.

Configuration

1

Add the [Send email](#) post function to the desired workflow transition or create a new transition.

2

From

Choose the option **User in field** with the value **"Current user"** (this is the default value).

3

To

Select **Field containing users** and select the field **Project lead**.

4

Email content

1

Subject

Select the parser mode **General** and enter plain text and optionally use [field codes](#) and [JWT expression parser functions](#).

2

Email format

Choose **HTML**

3

Body

Select the parser mode **General** and enter the following expression:

```
<p>
Hi ${issue.project.leadDisplayName},
</p>

<p>
Please have a look at the attachment which was provided during the transition:
<a href='${system.baseUrl}/secure/attachment/${jiraExpression("issue.
changelogs.map(i=>i.items).flatten().filter(i=>i.field=="Attachment" && i.to
!= null)[0]?.to")}/${jiraExpression("issue.changelogs.map(i=>i.items).
flatten().filter(i=>i.field=="Attachment" && i.toString != null)[0]?.
toString")}'>${jiraExpression("issue.changelogs.map(i=>i.items).flatten().
filter(i=>i.field=="Attachment" && i.toString != null)[0]?.toString || \"
\")}</a>
</p>

<p>
Cheers
</p>
```

If no attachmant is available for this issue, no link will be created.
