

latestReleasedVersion()

This function returns the **name** of the **latest released** version in the current issue's project. The version might also be **archived**!

The **release dates** are analyzed in ascending order, and by **sequence** (i.e., as shown in UI) in ascending order.

Syntax

```
latestReleasedVersion() #Output: Text
```

Examples

Parser expression	Description
Syntax latestReleasedVersion()	This example returns the name of the latest released version , e.g.: 2.9.2
