

status()

This function returns the **status name** for a given **ID**.

syntax

```
status(id) #Output: Text
```

Examples

Parser expression	Description
<code>%{status(1)}</code>	This example returns the name of the status with the ID 1, e.g. Open

Additional information

Parameters used in this function

Parameter	Input (data type)	Description
id	NUMBER	A valid status ID.

Output

This function returns a TEXT

If there is no status with the given ID, the function returns NULL

Use this function to ensure expressions will continue to work after **renaming** statuses.

Will continue to work after status name update ✓	Will fail after status name update ✗
<code>%{issue.status} = status(1)</code>	<code>%{issue.status} = "In Progress"</code>
