# Rename page

Renaming pages has never been quicker. No need to edit and save - just **rename a page on the fly**!

You can rename a page directly by **double-clicking** on the selected page **name.**

Your browser does not support the HTML5 video element

1

**Right-click** on the desired page or **hover** over the page and click on the **ellipsis** menu "**...**"

2

Select the **Rename** action.

3

Type in a new page name.

4

Hit "**Enter**" or click outside of the dialogue.

If you still have questions, feel free to refer to our support team.
