Migrate 'User is not in project role'

The User is not in project role of JWT DC is not yet available in JWT Cloud, but can be implemented easily using a Jira expression condition.

Migration steps

1 Add a Jira expression condition.

2 Use this Jira expression

```
!user.getProjectRoles(new Project(issue.project.id)).map(p => p.name).includes("PROJECT_ROLE")
```

PROJECT_ROLE is the project role name that the **current user** must **not be a member of**.
