Space Tools Pro release notes 1.1.0

Release date	31 Mar 2022
Release type	NEW FEATURES IMPROVEMENTS
Highlights	Extended and reworked quick actions

New features

- Confluence-styled **quick actions** have been added to the space navigator

Improvements

- **Edit in a new tab**, **Bulk open** and **Bulk edit** are available as context actions
- The space navigator can be accessed using the **Apps** drop-down in the top navigation bar
- Spaces are opened with an **expanded page tree**
- **Space key auto-suggest** is available when creating new spaces
- Setting a new page title is supported when copying a page
- Several **UI improvements**

Bug fixes

- Prefixes for child pages were also added to the parent page when copying pages under certain circumstances
- Copying pages did not work properly under certain circumstances
- Drag and drop of pages did not work properly with expanded page trees
- Some actions did not work properly when the target space was not selected or visible in the space navigator
- Some minor UI and performance bug fixes

Do you have ideas for additional improvements? Many new features in our products result directly from customer feedback.
