

# Migrate 'Mathematical or date-time expression calculator'

The [Mathematical or date-time expression calculator post function of JWT DC](#) is not available in JWT Cloud, but can be implemented easily using the [Update fields](#) post function.

The table below shows the detailed mapping between these post functions and hosting options.

## Migration steps

- 1

Add the [Update fields](#) post function.
- 2

Reconfigure the post function with the help of the following list, providing the necessary basics.

## Migration details

JWT DC parameter	 JWT DC parameter options	 JWT Cloud parameter options	Notes
		Target issue: Current issue	Only available in JWT Cloud. Use the default value <b>Current issue</b> .
Target field		Since this parameter is not available in JWT Cloud, please proceed as follows: <ul style="list-style-type: none"><li>Select the corresponding out of the list provided by the parameter <b>Fields</b></li><li>Choose the option <b>Set field value manually (parser expression)</b></li></ul>	
Expression		<ul style="list-style-type: none"><li>Choose the parsing mode <b>General</b> in the parser expression editor opened for the parameter <b>Source field</b> and</li><li><b>Parser expression</b> according to <a href="#">Migrate JWT parser expressions</a></li></ul>	
Additional options			Not available in JWT Cloud.
Conditional execution		<ul style="list-style-type: none"><li><b>Logical</b> parsing mode</li><li><b>Parser expression</b> according to <a href="#">Migrate JWT parser expressions</a></li></ul>	

<b>Run as</b>	<p>A drop down menu where you can select a field (all available <a href="#">Fields</a> are listed)</p> <p>The default is <b>Current user</b></p>	<p>The options are equivalent to the ones in JWT DC but split in two separate entries:</p> <ul style="list-style-type: none"> <li>• <b>Selected user</b>, where you can pick a specific user</li> <li>• <b>User in field</b>, where all User fields (e.g. <b>Assignee</b> or <b>Project lead</b> as well as all custom fields of the type <b>User picker (single user)</b> are listed</li> </ul> <p>The default is the same as in JWT DC: <b>Current user</b></p>	<div data-bbox="932 191 1435 254"> <p>Since only those fields can be selected which hold a user, it may happen that the value from JWT DC cannot be mapped to the respective field in JWT Cloud.</p> </div>
