

# Migrate 'Compare two values validator'

The [Compare two values validator](#) of [JWT DC](#) is also available for [JWT Cloud](#).

Since JWT DC field codes are not available in conditions or validators in JWT Cloud, they have to be replaced by their Jira expression equivalent.

## Migration steps

- 1

Add the [Compare two values validator](#).
- 2

Reconfigure the validator with the help of the following list, providing the necessary basics.

## Migration details

|  JWT DC parameter |  JWT Cloud parameter                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Notes                                                                                            |                                                                                                     |                                   |                                   |                          |                          |                                      |                                      |                             |                             |                             |                             |                         |                         |                                     |                                     |                                       |                                       |                              |                              |                                          |                                          |                                           |                                           |                                              |                                              |                                             |                                             |                                                                                                                         |

| All <b>custom field types</b> | All <b>custom field types</b> provided by JWT DC except <b>Text Field (read-only)</b> |

**Right-hand side value**

#### Comparison value

The following list presents the fields supported by the [Compare two values validator](#) in JWT Cloud. Fields not appearing in this list, cannot be mapped to JWT Cloud. All fields are available for the contexts "issue" and "parent".

Either a field can be selected or a value can be set manually. In JWT Cloud one of these options has to be selected first and then a field or a value by using the parser expression editor has to be provided.

## Fields

|  <b>JWT DC field</b> |  <b>JWT Cloud field</b> |
|-------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|
| Affects version/s                                                                                     | Affects version/s                                                                                        |
| Assignee                                                                                              | Assignee                                                                                                 |

Due to the different architecture, it may happen that the condition gets too complex. This is the case when many fields are checked. The condition cannot be saved, and a corresponding error message will be displayed. If that's the case, the condition has to be split up into two or more.

## Validation options

This parameter is not available in JWT Cloud.

## Error message

In JWT Cloud, only a fixed text without field codes or translations is supported.

If you still have questions, feel free to refer to our [support](#) team.
