Third-party app fields		

In the [Filter Results \(by sumUp\)](#) all fields can be displayed.

Fields that can be summed up

Currently, all fields can be summed up in the gadgets (meaning that the total will be displayed in the sum row) that return a **value that can be cast to a number (integer or double)**, e.g.

- 2
- 3,7
- 5.1

If you still have questions, feel free to refer to our [support](#) team.
