

Notify about date of last comment for high priority issues

On this page

[Scheduled event](#) | [JQL selector](#) | [Send email action](#) | [Import the example](#) | [Related use cases](#)

Use case

Never miss a last comment from a high priority issue by receiving an email notification displaying the date of the last comment on the issue and its commenter.

The email will be sent once a week for all high priority issues that are not resolved yet.

Scheduled event

1

Create a new rule and name it appropriately.

Providing a description will help you to identify what the rule does but this step is **optional**.

2

Add a **Trigger** **Scheduled**

1

Schedule

Choose **Days per week**

2

Interval

Choose **once per day at 1:00 am** and check **Monday**

JQL selector

3

Add the following expression:

priority = High and resolution is empty

Send email action

4

Next to the **JQL selector** click on **Add Action Send email**

1

From

Select the user that the email will be sent from.

2

To

Select the recipients.

3

Message

First, enter a subject for your email

Subject

`%{trigger.issue.key} = "is of high priority"`

Then a body

Body

Please check the following:
`%{selector.issue.key} got last commented on {{{dateTimeToString(first (allCommentDates()), "MMMM dd, YYYY", USER_LANG)}}} by %{selector.issue.lastComment.author}`

Cheers,
Admin

Please make sure that the **parsing mode** for the **body** is set to **mixed mode**.

5

Enable the rule by clicking on the **Enable button** 

Import the example

Import the **JSON** file below to get started in no time.

JSON

After importing the JSON file, make sure to **check the configuration** of the rule. Non-existing configuration elements (issue types, fields, values etc.) will be highlighted.
