

# Action templates

JWT comes with powerful but handy remote action templates that can be used within the [Execute remote action](#) post function.

## Templates

| Action   | Description  | Applications       | Label      |
|--|--|--------------------|------------|
| <a href="#">Create an external link remote action</a>      | Add an external link to an issue in Jira.                            | JIRA CLOUD         | STAFF PICK |
|  |  | JIRA ON-PREM       |            |
| <a href="#">Create an issue comment remote action</a>      | Add a comment to an issue in Jira.                                   | JIRA CLOUD         | STAFF PICK |
|  |  | JIRA ON-PREM       |            |
| <a href="#">Create a page remote action</a>                | Create a new page in Confluence.                                     | CONFLUENCE CLOUD   | STAFF PICK |
|  |  | CONFLUENCE ON-PREM |            |
