

Keep the status of an issue and its linked issues in sync

On this page

[Configuration](#) | [Related use cases](#)

Use case

Update the status of the linked issues to the status of the current issue after transitioning the current issue.

Configuration

1

Add the [Transition issue](#) post function to the transition of your choice or create a new one.

In our case we created a transition called **Reject** that goes to status **Rejected**.

2

Target issue

Choose **Linked-issues**

3

Filter by link type

Select the issue link types that connect the current issue with the linked issues.

In our case we added only the *duplicates* issue link type.

4

Filter by issue type

Select the issue type of the linked issues that must be transitioned, as for instance, **Bug**.

5

Filter by status and Filter by resolution

These fields can be left **blank**.

6

Mode

Choose **Transition to status** and select **Rejected** from the drop down menu.

Make sure that the status can be reached by the linked issues from their current status. Otherwise they will not be transitioned.

Related use cases

Use case	JWT feature	Workflow function	Parser functions	Label
Fast-track transition issues assigned to the project lead		Transition issue		STAFF PICK
Keep the status of an issue and its linked issues in sync		Transition issue		
Keep the status of parents and sub-tasks in sync (post function use case)		Transition issue		
Reopen parent issue, if a sub-task is reopened		Transition issue		
Start Progress on parent, if sub-tasks are started		Transition issue		STAFF PICK
