

Invite a user remote action

This action template provides the functionality to create a **new user** to an **Atlassian Cloud site**.

The internal instance connection cannot be used in this case! Due to limitations of the Jira Cloud architecture, you need to create an external connection even if the user should get invited to the current cloud site.

Configuration

Email address

The **Email address** parameter defines the email of the new user.

Action-specific response options

The response options define values which are taken from the REST response of the executed template.

Value	Description
Account ID	Returns the Atlassian account ID of the invited user.

Other **default options** like **Response body**, **Response status** or **Set field value manually** are available in any mode in the post function.

Use cases and examples

Use case	JWT feature	Workflow function	Parser functions	Label
Automatically create a version when starting the release		Execute remote action		
Automatically link an issue to an external one		Execute remote action		
Automatically log work on a Jira issue		Execute remote action	dateTimeToString()	
Create a comment on an external Jira ticket		Execute remote action		
Create a new employee account during an onboarding process		Execute remote action		
Create an external project for a new employee during an onboarding process		Execute remote action		

Create an overview page for a software release		Execute remote action	
Create a personal space for a new employee		Execute remote action	
Get Hubspot contact information		Execute remote action	
Link a Jira issue with the corresponding release ticket		Execute remote action	
Link issue to issue mentioned in its description		Execute remote action	findPattern() first()
Notify the reporter of an issue about its status by a Telegram message		Execute remote action	
Read the information from a Trello card		Execute remote action	
Retrieve the assets of an issue in Jira cloud		Execute remote action	
Set the assignee of an external issue same as the transitioned issue		Execute remote action	
Set User Picker field with users from group		Execute remote action	
Transition an external Jira ticket based on the linked internal one		Execute remote action	
Translate the description		Execute remote action	findReplaceAll()
