

Get related assets (Insight) remote action

This action template provides the functionality to **get all assets** that are linked to the current issue in **Jira on-prem**.

Configuration

This action template does not require input parameters for the configuration.

Action-specific response options

The response options define values which are taken from the rest response of the executed template.

Value	Description
List of object keys	Returns a list of existing object keys.
List of object labels	Returns a list of existing object labels.
List of object type labels	Returns a list of existing object type labels.

Other **default options** like **Response body**, **Response status** or **Set field value manually** are available in any mode in the post function.

Use cases and examples
