

Create a version remote action

This action template provides the functionality to create a new project **version** within a Jira Cloud or Jira on-prem instance.

Configuration

Name

The **name** parameter defines the name of the new version to be created.

Project key

The **Project key** parameter defines the project where the version should be created.

Description (optional)

The **Description** parameter allows setting some descriptive sentence to the version to be created.

Action-specific response options

The response options define values which are taken from the rest response of the executed template.

| Value | Description |
|------------|---|
| Project ID | Returns the project ID where the new version is created. |
| Version ID | Returns the new version ID created by the action. |

Other **default options** like **Response body**, **Response status** or **Set field value manually** are available in any mode in the post function.

Use cases and examples

| Use case | JWT feature | Workflow function | Parser functions | Label |
|--|---|-----------------------|--------------------|-------|
| Automatically create a version when starting the release |  | Execute remote action | | |
| Automatically link an issue to an external one |  | Execute remote action | | |
| Automatically log work on a Jira issue |  | Execute remote action | dateTimeToString() | |

| | | | |
|--|---|-----------------------|-----------------------|
| Create a comment on an external Jira ticket |  | Execute remote action | |
| Create a new employee account during an onboarding process |  | Execute remote action | |
| Create an external project for a new employee during an onboarding process |  | Execute remote action | |
| Create an overview page for a software release |  | Execute remote action | |
| Create a personal space for a new employee |  | Execute remote action | |
| Get Hubspot contact information |  | Execute remote action | |
| Link a Jira issue with the corresponding release ticket |  | Execute remote action | |
| Link issue to issue mentioned in its description |  | Execute remote action | findPattern() first() |
| Notify the reporter of an issue about its status by a Telegram message |  | Execute remote action | |
| Read the information from a Trello card |  | Execute remote action | |
| Retrieve the assets of an issue in Jira cloud |  | Execute remote action | |
| Set the assignee of an external issue same as the transitioned issue |  | Execute remote action | |
| Set User Picker field with users from group |  | Execute remote action | |
| Transition an external Jira ticket based on the linked internal one |  | Execute remote action | |
| Translate the description |  | Execute remote action | findReplaceAll() |
