

Set a date two months after the end of the quarter

On this page

[Prerequisites](#) | [Configuration](#) | [Related use cases](#)

Use case

Configure a calendar with the dates of the ends of the quarters and set automatically a date in a *Date Picker* field two months after the closest one.

Prerequisites

1

Create a **Calendar** named **End of Quarters** with the following specification:

```
MAR/31, JUN/30, SEP/30, DEC/31 {  
  
08:00 - 09:00;  
  
}
```

You can change the dates to specify when the quarters or the business periods end.

Configuration

1

Add the [Update or copy field values](#) post function to the transition of your choice.

2

Target issue

Choose **Current issue**

3

Fields

1

Field

Choose a **Date Picker** field

2

Value

Choose **Set field value manually**

3

Expression

Use the following expression in with the expression editor in **Numeric** mode

```
addMonths(nextTime({system.currentDateTime}, "End of Quarter", LOCAL),2, LOCAL)
```

You can modify the number of months added to the date by replacing the number 2 in the expression with the amount of numbers that you need to add.

**Related use cases**

Use case	JWT feature	Workflow function	Parser functions	Label
Add days skipping weekends and holidays to a Date Picker field		Update or copy field values	addTime()	
Add or remove request participants		Update or copy field values
