

# Link issue to issue keys in its description

On this page

[Configuration](#) | [Related use cases](#)

## Use case

Look for the **issue keys** of different issues included **in the description** of the current issue and link them with a specific **issue link type**.

### Configuration

1

Add the [Update or copy field values](#) to the transition of your choice.

1

#### Target issue

Choose **Current issue**

2

#### Field

Choose the **Temporary text 1**

3

#### Value

Choose **Set field value manually**

4

#### Expression

Add the following expression in **Advanced text** mode.

```
toString(findPattern(%{issue.description}, "[A-Z]{2,}-[0-9]+"))
```

2

Add the [Create issue link](#) post function to the same transition after the [Update or copy field values](#) post function.

1

#### Issue link type

Select the **issue link type** that should link the main issue with the issues mentioned in the description.

2	<b>Source issues</b> Select <b>Current issue</b>
3	<b>Destination issues</b> Select <b>Issue keys</b> in issue list
4	<b>Field</b> Choose <b>Temporary text 1</b>
