Highlights	Maintenance release

Improvements

- Several **UI improvements**

Bug fixes

- The order of permissions inside the permissions browser did not match the default one in Confluence
- The keyboard shortcut to restore an item did not work properly
- Attachment selection was lost under certain circumstances when editing an already configured attachment cleanup service
- Search and replace did not work properly for blog posts
- No error was shown when trying to move a page to a space where a page with its name already exists
- The progress bar did not work properly when moving a page to multiple spaces
- The page picker did not work properly when trying to copy a page to a personal space
- Reordering pages using drag and drop did not work properly when using Refined
- Labels and attachments were not copied correctly when copying a space
