

Get attributes of Assets objects

On this page

[Configuration](#) | [Related use cases](#)

Use case

Obtain the values of the attributes of Default type of the Assets objects that have a connection with the transitioned issue.

Configuration

1

Add the [Execute remote action](#) post function to the transition of your choice.

2

Create remote action

Select the template [Get related assets](#).

3

Select connection

Choose **an existing connection** to the current instance.

4

Customize your action

Set action parameters

1

Increase or decrease optionally the number of assets returned by updating the parameter *Maximum assets returned*.

Update issue fields (optional)

2

Choose a field to store the response of the action and update it with the following expression.

```
%{action.response.objectEntries[*].attributes[?objectTypeAttributeId==`9`.objectAttributeValues[*].value[[]]}
```

Please, replace the id of the attribute in the expression with the id of the attribute in question before testing it. In our case, the id is the number 9.

You can obtain the id of the attribute in the *Attribute* tab of the *Object schema*.

Related use cases

Use case	JWT feature	Workflow function	Parser functions	Label
Automatically create a version when starting the release		Execute remote action		
Automatically link an issue to an external one		Execute remote action		
Automatically log work on a Jira issue		Execute remote action	dateTimeToString()	
Clone issue in external instance		Execute remote action
