

Get Checklist

On this page

[Configuration](#) | [Related use cases](#)

Use case

Get a JSON with the values of a Checklist custom field of [Checklist for Jira](#) from the transitioned issue using the Jira's [Get Issue REST API](#).

Configuration

1

Add the [Execute remote action](#) **post function** to the desired transition.

2

In **Expert mode**, create a **new action** with the following parameters:

1

Name

Enter **Get Checklist** as the name of the new action.

2

Method

Select the **GET** method.

3

Default connection

Select the connection with the **current instance**.

4

REST path.

Use the following **REST path**.

```
/rest/api/2/issue/{issueIdOrKey}
```

5

REST path parameter

For the REST path parameter *issueIdOrKey*, select the field **Issue key**.

3

Update a Text field with the following expression after **replacing the ID** of the Checklist field with the appropriate one:

```
%{action.response.fields.customfield_aaaaa}
```

In order to obtain a particular value of the field, you should further [specify the JMESPath query for the field code](#).
