

Set User Picker field with users from group

On this page

[Configuration](#) | [Related use cases](#)

Use case

Get the **users from a group** and set a *User Picker (multiple users)* field with them.

Configuration

1

Add the [Execute remote action](#) **post function** to the desired transition.

2

Create a remote action

In **Expert mode**, create a **new action** with the following parameters:

1

Name

Enter **Get users from group** as the name of the new action.

2

Method

Select the **GET** method.

3

Default connection

Select the connection with the **current instance**.

4

REST path

Use the following **REST path**.

```
/rest/api/2/group/member?{groupId}
```

5

REST path parameter

Introduce the **group Id** of the group of your choice as the **value of the parameter *groupId***.

3

Update the field

1

Field to be set

Choose a **User Picker (multiple users)** field.

2

Value

Enter the following expression.

```
%{action.response.values[*].accountId}
```
