

Create page from template

The **Create page from template** action allows you to swiftly set up a prepared page using Atlassian-provided **templates** as well as your **own private** or **company templates**.

1

Right-click on the desired page or **hover** over the page and click on the **ellipsis** menu "..."

2

Select the **Create page from template** action.

3

Name the new page.

4

Select the **template** of your choice.

Please note, that all templates are listed in the drop-down, not only the ones which are enabled for the selected space.

5

Click on the **Create** button.

6

Click on **Save**.

If you still have questions, feel free to refer to our [support](#) team.
