

Number of hours in the current priority

Use case

This calculated field returns the **number of hours that an issue has had the current priority**. The value of the field will change when the *Priority* field is updated with a different value.

Configuration

1

[Create](#) a new **Calculated Number Field (by JWT)** custom field and name it properly.

Providing a description will help you to identify what the custom field does but this step is **optional**.

2

Parser expression

Add the following expression:

```
timeInValue(%{issue.priority},  %{seed.text} = %{issue.priority}) / {HOUR}
```

3

Display format

1

Content type

Choose **Number**

2

Number format pattern

Choose

```
### hours
```

4

Add the field to the relevant view **screens**.

Remember: All calculated fields are **read-only** and cannot be manually updated on a create or edit screen.
