Expand / collapse pages
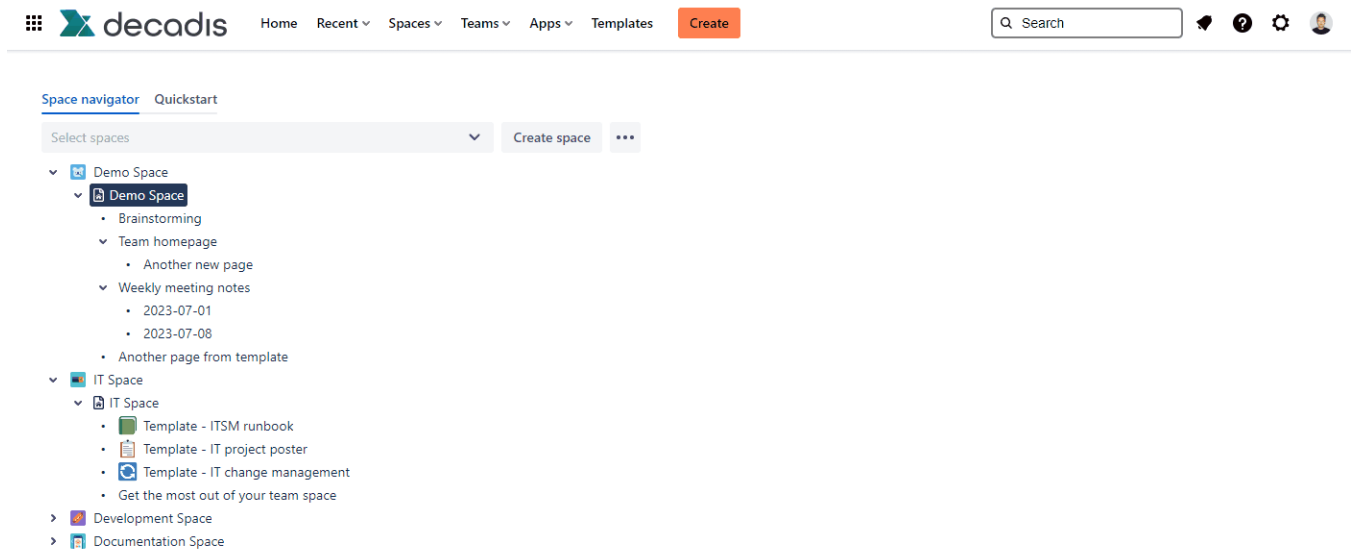

The **expand / collapse** action allows you to view or hide all pages of a selected root page.

In case not all pages are expanded, the expand option will be shown.

If all pages are expanded, the collapse option will be shown.

1	**Right-click** on the desired page or **hover** over the page and click on the **ellipsis** menu "**...**"

2	Select the **Expand / Collapse** action.

3	The subpages are now expanded or collapsed.
